

Problem N. CodeChef Learn Problem Solving

Time Limit 1000 ms

Code Length Limit 50000 B

OS Linux

In the new [CodeChef Learn module](#), under the “Learn Problem Solving” section, there are two courses for each language. For eg. “Python Beginner – Part 1” and “Python Beginner – Part 2”. These courses help you get started with CodeChef contests.

Currently there are courses for 4 languages, and hence there are 8 courses in this section. But suppose there are courses for N languages, what will be the total number of courses in this section?

Input Format

The only line of input will contain a single integer N , denoting the number of languages for which there are courses.

Output Format

Output on a single line the total number of courses in the section.

Constraints

- $1 \leq N \leq 100$

Sample 1

Input	Output
4	8

If there are 4 languages, then there will be $2 * 4 = 8$ courses in total.

Sample 2

Input	Output
9	18

If there are 9 languages, then there will be $2 * 9 = 18$ courses in total.
